

### **Director of Risk Management – Conroe, Texas**

The Director of Risk Management will direct the clinical risk management program, including the functions of clinical risk management, claims management, program administration and risk management education for this facility. Reporting to the Director Quality/Risk Management/Medical Staff Services, this individual will be responsible for coordinating those systems necessary for identification, evaluation, monitoring, reduction and/or elimination of professional and general liability risk exposure. She/he will provide counseling and education to facility leadership, clinical personnel, board of trustees and medical staff members related to risk exposures including risk prevention and risk reduction. The Director of Risk Management will participate in the management and support of professional liability litigation at the direction and under the guidance of the HCI Department of Claims.

1. BSN required
2. Minimum of 5 years health care experience (clinical experience preferred).
3. Minimum of 2 years experience in clinical risk management preferred.
4. Supervisory and/or management experience required.
5. Comfortable and skilled at working with physicians, health care providers and other stakeholders in the organization.
6. Capable of gaining immediate credibility with individuals through experience, presentation, communication skills, empathy and compassion.
7. Analytical skills including a working knowledge of basic statistics and statistical analysis.
8. Knowledge of PC based computer software, i.e., Word, Excel, Access and/or similar systems preferred.
9. Ability to work independently and interdependently.
10. Broad knowledge and familiarity with healthcare-related and accreditation requirements.
11. Meets requirements of local jurisdiction for risk management certification.
