

### **Director of Risk Management – Webster, Texas**

The Director of Risk Management will direct the clinical Risk Management and Patient Safety Programs, including the functions of clinical risk management, claims management, program administration, risk management and patient safety education and patient advocacy for Clear Lake Regional Medical Center. Reporting to the Medical Director, the Director of Risk Management will be responsible, either personally or through delegation, for coordinating those systems necessary for identification, evaluation, monitoring, reduction and/or elimination of professional and general liability risk exposures and overseeing a comprehensive patient safety program in an effort to improve patient safety and reduce adverse events and risk of occurrence/recurrence. He/she will provide counseling and education to facility leadership, clinical personnel, Board of Trustees and Medical Staff members related to risk exposures, including risk prevention and reduction and improving patient safety. The Risk Management Claims Manager will participate in the management and support of professional liability litigation at the direction and under the guidance of the HCI Department of Claims.

Education: RN Baccalaureate degree (healthcare-related preferred) Experience: Minimum of 5 years health care experience (clinical experience preferred)

Minimum 2 years experience in clinical risk management manager or director level required.

#### **Special Qualifications:**

Comfortable and skilled at working with physicians, healthcare providers and other stakeholders in the organization.

Capable of gaining immediate credibility with individuals through experience, presentation, communication skills, empathy, and compassion.

Analytical skills including working knowledge of basic statistics and statistical analysis methodologies.

Knowledge of PC based computer software (i.e., Word, Excel, Access and/or similar systems preferred)

Ability to work independently and interdependently.

Broad knowledge and familiarity with healthcare-related regulatory and accreditation requirements.

Meets requirements of local jurisdiction for risk management certification.
